

Human at the centre. AI at your side.

Starting AI is easy. Embedding it in how your people work is the craft PICASSO is built for.

— Seven elements. One craft. An ACM change thread through every step, on a Governance canvas.

THE FRAMEWORK

Seven elements, painted as one journey.

Your proven phases stay intact. Two craft layers, Change and Sherpa, weave through them, and Orchestrate designs how the whole system moves. Held between two rails: a Governance canvas beneath, and an ACM change thread through every element.

WALK THE JOURNEY

Your people lead every step.

You make the calls and own the results. We set up each stage and stay close, so nothing stalls. The change thread moves your people along at every beat.

- **AI Pulse** **BEHAVIOUR: AWARE**

Before a tool lands, surface the human signal: appetite, fear and friction, mapped with the use cases.
- **AI Change** **WILLING TO PRACTISING**

The thread's home. Sponsors, champions and the everyday behaviours that make capability stick.
- **AI Scale + Operate** **HABITUAL • TEAM TO ENTERPRISE**

The behaviour spreads across teams, then sustains once it is live. Norms harden.
- **AI Orchestrate** **CULTURAL • AGENCY: LEADING**

Your people design how work moves. Judgement stays human by design.
- **AI Ignite** **BEHAVIOUR: WILLING**

The first win builds belief faster than any business case. People move from curious to willing.
- **AI Accelerate** **BEHAVIOUR: PRACTISING**

Build the habit into the workflow, not around it. The new way becomes the default path.
- **AI Sherpa** **AGENCY: FLUENT TO LEADING**

Capability transfers into your people through the hard climb. **Ownership, not dependency.**
- **AI Governance** **THE CANVAS BENEATH**

One steady foundation. You move fast precisely because the ground is solid.

Method gets you moving. **Craft gets you results your people trust and own.**

THE ACM OVERLAY

PICASSO is **what we create**. **ACM** is **how we think, work and operate**.

Adoption and change is the thread, not a workstream.

Old ACM manages people through a change. Modern ACM changes how people behave, by choice, with the human at the centre. This is not a product or vendor push. It is a people craft.

VENDOR ACM · THE OLD WAY

People as risk to manage.

Treats humans as resistance to handle. Ends the day the tool goes live. It is why pilots die in Pilot Purgatory.

- × Resistance management
- × Training completion
- × A comms plan at go-live
- × A change team's workstream
- × Tool rollout, then walk away

THE CHANGE THREAD · MODERN ACM

People as the whole point.

Builds capability your people own long after any tool retires. Behaviour shifts by choice, with AI at their side.

- Agency building
- Habit formation
- A behaviour system from the first Pulse
- How everyone thinks, works and operates
- Human capability that outlasts the tool

This is not a product push. It is a people craft.

Three axes, moving at once.

Maturity is not one number. A person or an organisation sits on three axes at the same time. The change thread moves all three, deliberately.

Behaviour · the shift How people actually work, not what they clicked.

01
Aware

02
Willing

03
Practising

04
Habitual

05
Cultural

Agency · the capability Human ownership alongside AI, never dependency.

01
Assisted

02
Confident

03
Fluent

04
Leading

Depth · the spread How far the new behaviour has actually travelled.

01
Individual

02
Team

03
Function

04
Enterprise

05
Ecosystem

A team can be **Practising** in behaviour, **Fluent** in agency, and still only **Team**-deep in spread. That gap is the plan. Name where you sit on each axis, then move all three.

MATURITY INDEX · EXAMPLE

47

/ 100

EARLY MOTION

Agency is the strength. **Depth** is the lever. The distance between them is where the next quarter of work sits.

YOUR NEXT MOVE

Advance **Depth**: Team to Function

Usage is not adoption. **Better work is.**

Logins and prompt counts say nothing about whether the work improved. The change thread measures the signals that compound.

- ✓ People choosing AI without being told
- ✓ New habits holding after the novelty fades
- ✓ Behaviour spreading past the team that started it
- ✓ Review cycles shorter without adding risk
- ✓ Peers teaching peers, unprompted
- ✓ Judgement getting sharper with better context
- ✓ Champions emerging without being appointed
- ✓ People owning the decision, not deferring to the tool

*If you cannot measure the behaviour shift, you have bought a tool. **If you can, you have built a capability.***

The hook, the hero and the core value.

THE HOOK

A name that sticks.

PICASSO reframes the category. Starting AI is easy, embedding it is the craft, and your people are what make it land.

THE HERO

Earns the dashboard.

Seven elements spelling one memorable word, headlining the hub. The framework becomes the story clients repeat.

THE CORE VALUE

Craft over checklist.

AI Change and AI Sherpa name what we do best: bringing your people along, and getting all the way to production with them.

Starting AI is easy. Changing how your people work is the craft. PICASSO is how you get there.
